Multan, Pakistan

SUMMARY

I am an experienced Flutter Developer with over 2 years of experience in building scalable and high-performance cross-platform mobile and web applications. I specialize in real-time systems, secure payment integrations, and clean architecture patterns. My track record includes delivering production-ready applications with Firebase integration, RESTful APIs, and advanced state management solutions

EXPERIENCE

02/2022

Multan, Pakistan

Mobile Application Developer
Maxcore Technologies

- A technology company specializing in mobile application development
- Designed and developed 4+ cross-platform mobile applications from scratch using Flutter framework, delivering high-performance solutions for Android and iOS platforms
 - Integrated Firebase services (Firestore, Realtime Database, Cloud Functions) for real-time data synchronization and backend operations across 10,000+ active users
 - Implemented advanced state management solutions (GetX, Riverpod) reducing app load time by 40% and improving overall application responsiveness
 - Integrated secure payment gateways and developed transaction processing systems ensuring PCI compliance and data security
 - Deployed 4+ applications to Google Play Store and Apple App Store achieving 4.5+ star ratings with 10,000+ combined downloads
 - Implemented RESTful API integrations and developed comprehensive backend connectivity solutions for multiple production applications
 - Collaborated with UI/UX designers to create responsive and intuitive user interfaces achieving 95%+ user satisfaction ratings
 - Optimized application performance through comprehensive code profiling, widget optimization, and efficient data management practices

EDUCATION

08/2019 - 11/2023

Dera Ghazi Khan

Bachelor of Science (BS)
Ghazi University

KEY ACHIEVEMENTS

High-Performance Applications

Successfully delivered multiple high-performance applications that are being used by thousands of active users and achieved high ratings on app stores

SKILLS

Flutter	Gmail	GitHub	Google Firebase	REST	Dart	Apple iOS	Payment Gateways	PCI
Google Maps	HiveQL	SQLite	Git	Android Studio	Visual Studio Code	Xcode	RESTful API	Dataflow
Google Maps API	ECommerce	Gateway	Agile	Scrum	Unit Testing	Integration Testing		
Android Deployment	iOS Deployment							

PROJECTS

GateLine / HostLine

📅 11/2025 - 3/2026

GateLine / HostLine - Community Security System

- Designed and developed comprehensive community security system with QR code and ID verification capabilities serving 10,000+ users
- Implemented real-time notification system and user authentication with Riverpod state management ensuring efficient data flow
- Integrated Firebase for real-time database operations and cloud function triggers for verification processing

Suraj Studio

📅 08/2024 - 04/2025

Suraj Studio - Booking & Billing System

- Developed cross-platform booking application with integrated billing system and workflow automation features for 5,000+ active users
- Implemented local database management using SQLite for offline functionality ensuring 99.5% app availability
- Developed media management system supporting image uploads and processing with optimized file storage

Faster

📅 01/2025 - 06/2025

Faster - Real-Time Delivery Application

- Architected and developed real-time delivery tracking system with live location updates and vendor matching algorithms for 3,000+ delivery partners
- Integrated Google Maps API for route optimization and delivery visualization reducing average delivery time by 35%
- Implemented Firebase real-time synchronization enabling live location tracking across entire delivery fleet

ExtBuy & Sourcesin

📅 02/2025 - 02/2026

ExtBuy & Sourcesin - Multi-Vendor eCommerce Applications

- Developed and maintained multi-vendor eCommerce applications serving 500+ merchants and 50,000+ customers
- Implemented secure payment gateway integration supporting multiple payment methods with PCI compliance
- Optimized application performance handling large product catalogs (10,000+ products) and concurrent transactions improving load time by 50%
